

Minutes of The Fourth Meeting

OS1 group B

27th Mar 2025

Chair Orvila Sarker

Secretary Tianhua Zhang

Members Cong Deng

Sheng Wang

Xin Wei

Yifan Gu

Apologies None.

1. Time and Place

The fourth team meeting for the MCI OS1 project was held at **Ingkarni Wardli 5.57** on **27th Mar** at **4:00 PM**.

2. Quorum Announcement

The Chairman announced that a quorum of the group was present, and that the meeting, having been duly convened, was ready to proceed with its business.

3. Summary of Previous Meeting

The team reviewed the progress made since the last meeting, including the ongoing development and refinement of the machine learning models, data processing strategies, and preparation for the Pitch Presentation.

4. Group Milestone

4.1. Pitch Presentation

The team conducted a rehearsal of the Pitch Presentation and received feedback from the tutor. The feedback included the following key points:

- Future Development Direction: The team needs to define a clear development roadmap for the project.
- Technical Demonstration: To highlight our technological advantage, a comparison between ChatGPT's responses and our model's responses should be included.
- Vectorization Method: Feedback suggested that the method BERT uses for vectorizing data might not be optimal for our specific case.
- LDA Categorization: It was recommended that we refine the classification method for the LDA model and integrate it into our project. Users could then select a category to find similar security-related questions, which may provide a useful development direction.

4.2. Questions Raised

- Should we record a video of the presentation?
Response: We can modify the presentation based on feedback and re-record the Pitch Presentation if necessary.
- Should we focus on short-term deliverables or long-term development?
Response: The team should prioritize short-term goals for now.

5. Next Steps

- Pitch Presentation Refinement: Implement feedback and improve the presentation.
- Technical Improvement:
 - Further evaluation of vectorization method.
 - Optimization of LDA categorization and website integration.
- Development Roadmap: Define a more concrete plan for future development.

6. Adjournment

The next team meeting is scheduled for **3rd Apr** at **4:00 PM**.
