

Minutes of The Eleventh Meeting

OS1 group B

29th May 2025

Chair Yifan Gu

Secretary Cong Deng

Members Tianhua Zhang

Sheng Wang

Xin Wei

Apologies None.

1. Time and Place

The eleventh team meeting for the MCI OS1 project was held via **Zoom video conference** from **8:00 AM to 9:00 AM** on **29th May**.

2. Quorum Announcement

The Chairman announced that a quorum of the group was present, and that the meeting, having been duly convened, was ready to proceed with its business.

3. Summary of Previous Meeting

In the previous meeting, we discussed the instructor's feedback on the documentation and test plan. Based on the suggestions received, we made corresponding revisions and submitted the updated test plan.

4. Group Milestone

4.1. Team Collaboration & Presentation Planning

This week, the team held multiple coordination meetings to plan the final presentation format. After discussion, we agreed to present our work using a combination of PowerPoint slides and live product demonstration.

The responsibilities for the presentation content were clearly divided among group members, ensuring an efficient and cohesive workflow.

4.2. Slide Structure & Content Allocation

We finalized the presentation structure into four major parts:

1. **Background & Objectives**

Introduce the dataset, project goals, and motivation.

2. **Live Demonstration**

Walk through the main features of our web interface in real time.

3. **Technical Architecture**

- Explain the backend structure, technology stack, and data flow
- Introduce key modules:
 - SVM & LDA for classification
 - Similarity search (vector & LLM filtering)
 - LLM integration for answer generation
 - Sentiment analysis module

4. **Conclusion & Reflection**

Share what we learned, challenges faced, and future improvements.

5. Next Steps

5.1. Integrate the classifier into the code framework

In addition to technical tasks, the team is currently focused on refining the presentation slides by supplementing missing content and improving visual and textual details.

We are also reviewing all key project components to ensure we are fully

prepared for the final demonstration. This includes revisiting the system architecture, model implementation details, and front-end integration.

The current version of the presentation will be reviewed and adjusted after the next meeting, based on feedback from the supervisor.

6. Adjournment

The next team meeting is scheduled for **June 3rd at 11:30 AM.**
